

Lively Online Professional Development for the Common Core: Introducing Pepper

Self-paced courses help educators become Common Core specialists

SAN FRANCISCO, CALIFORNIA – SEPTEMBER 30, 2013 – WestEd and Public Consulting Group (PCG) today announced the launch of Pepper, self-paced, online professional development for educators implementing Common Core State Standards (CCSS).

To help teachers and districts successfully understand and implement the new rigorous standards, Pepper provides unlimited access to a series of online courses in Math and English Language Arts (ELA). The initial launch includes six courses, with additional courses to be released throughout the school year.

“If we expect to prepare our students for college and careers, our teachers need to gain mastery in developing and delivering instruction aligned to the Common Core. With Pepper, any teacher in the nation can become a CCSS specialist, collaborating with other educators to create solutions for 21st century learners,” says Glen Harvey, WestEd CEO.

Pepper uses a supportive online environment in which educators can master courses at their own speed, collaborate with others, develop a portfolio, and become specialists in standards-aligned teaching and learning strategies that lead to student success.

“We’re thrilled to be partnering with WestEd on this important online resource for educators. PCG Education is dedicated to helping schools navigate the shift to Common Core,” says Grant Blair, Director of PCG Education. “The timing is critical and the content is exceptional.”

Benefits of Pepper online professional development include:

- Self-paced, 24/7 access to CCSS courses in Math and ELA/Literacy
- Progressive mastery of the knowledge and use of CCSS concepts

- Digital resources for students and teachers corresponding to each course
- Collaboration with other CCSS specialists in online forums
- Archived personal portfolios with reflection journals and completion badges

Pepper also includes a bank of next-generation technology-enhanced items to prepare teachers for the new, national Smarter Balanced and PARCC assessments.

Pepper is created through a partnership between WestEd and PCG Education. Since 1966, WestEd has been a leader in research- and standards-based education improvement, and trains thousands of teachers each year. PCG Education's on-the-ground K-12 consulting experience in states across the U.S. spans more than 26 years.

Pepper is built on the robust edX platform, with CCSS course development provided by WestEd specialists and supported by PCG Education's national team of consultants.
